MINNESS DOES NOT PAY .- There is no greater mistake that a business man can make than to be mean in his business-always taking the half cent for the dollars he has made and is making. Such a values is very much like the farmer who sows three perks of seed where he ought to have sown five; and as a recommense for the meanness of his soul, only gets ten when he ought to have got fifteen bushels of grain. Every body has heard of the proverb of penvestment. There are people in the world who are short sighted enough to believe their interests can be hest promoted by grasping and clinging to all they can get, and never letting a cent slip through their fagers. As a general thing it will be found, other things being equal, that he who is most liberal, is the most successful in business. Of course we do not mean it to be inferred that a man should be proheal in his expenditures; but that he should show to his customers, if he is a trader, or those whom he may be doing any kind of business with, that in all his transactions, as well as social relations, he acknowledges the everlasting fact that there can be no permanent presperity in a community where bene- scream. hts are not reciproral .- Hunt's Merchants' Magazine.
